

SECURITY FOR CANNABIS & DISPENSARIES

State-Compliant Security Design in Minutes

Navigate complex state-by-state cannabis security requirements with AI-powered compliance and design tools.

Every state has different requirements. Camera angles, retention periods, vault specs, seed-to-sale tracking — Design Right AI knows them all.

COMMON STATE REQUIREMENTS

**Camera Coverage**

Point-of-sale, vault, grow rooms, entrances, parking — specific angles and resolution mandated

**Video Retention**

30–90 day retention depending on state, tamper-proof storage required

**Access Control**

Limited access areas, biometric requirements, visitor logs

**Vault & Safe Rooms**

UL-rated safes, camera coverage of all vault activity

**Alarm Systems**

Duress alarms, holdup buttons, 24/7 central station monitoring

**Seed-to-Sale Integration**

Track & trace camera correlation, chain of custody documentation

PLATFORM FEATURES FOR CANNABIS

**Harvey AI**

Ask “What does Colorado require for a dispensary?” and get instant, current answers

**Estimator Hub**

Pre-built cannabis security templates with **state-specific equipment lists**

**Creative Studio**

Design camera layouts meeting **exact angle/coverage mandates**

**Proposal Maker**

Generate **state-inspector-ready documentation** in minutes
