

SECURITY FOR BANKING & FINANCIAL

Bank-Grade Security Design & Compliance

PCI-DSS compliant security system design with standardized branch templates and vault monitoring.

FINANCIAL COMPLIANCE FRAMEWORKS — BUILT IN

PCI-DSS

Payment card industry data security

GLBA

Gramm-Leach-Bliley Act safeguards

SOX

Sarbanes-Oxley audit requirements

BSA/AML

Bank Secrecy Act monitoring

FFIEC

Federal Financial Institutions guidelines

UL 2050

National industrial security

BANKING SECURITY SYSTEMS

**Branch Standardization**

Template-based design for consistent security across 10 or 1,000 branches

**Vault & Safe Deposit**

UL-rated vault cameras, time-lock integration, dual-custody verification

**ATM Surveillance**

Skimmer detection cameras, transaction correlation, facial capture

**Access Control**

Mantrap entries, teller line panic buttons, after-hours restricted access

**Transaction Monitoring**

POS camera correlation, suspicious activity flagging

**Fire & Intrusion**

Combined fire/intrusion panels, central station monitoring

**Branch Standardization**

Design one branch template, deploy to hundreds. Estimator Hub scales your standard security package with location-specific adjustments automatically.
