

SECURITY FOR HOUSES OF WORSHIP

Protect Your Congregation With Confidence

Budget-conscious security design with volunteer-friendly proposals for churches, synagogues, mosques, and temples.

KEY CHALLENGES

**Limited Budgets**

Every dollar counts — donations fund security alongside ministry.

**Volunteer Security Teams**

Need simple, intuitive systems that anyone can operate.

**Open-Door Philosophy**

Balancing a welcoming atmosphere with meaningful safety measures.

**Multi-Use Facilities**

Worship, daycare, events, offices — one building, many needs.

SECURITY SYSTEMS FOR WORSHIP

**Perimeter & Parking**

Entrance monitoring, parking lot coverage, license plate capture

**Entry Management**

Visitor screening, children's ministry check-in, lockdown capability

**Mass Notification**

Panic buttons, emergency PA, silent duress alerts

**Childcare Security**

Secure children's areas, parent verification, camera monitoring

**Fire & Life Safety**

Occupancy-appropriate detection and notification systems

**Simple Infrastructure**

PoE cameras, cloud storage options, minimal IT requirements

BUDGET-FRIENDLY APPROACH

**Phased Implementation**

Start with essentials, expand later — plans that fit any timeline and budget.

**Good / Better / Best Tiers**

Equipment options at every price point so congregations can choose wisely.

**Grant-Ready Proposals**

DHS and state faith-based grant applications with professional documentation.

**Board-Presentation-Ready**

Proposal Maker generates polished documents for board and committee review.

“We presented a professional proposal to our board in 2 hours instead of 2 weeks. The phased approach made it affordable.”

Secure Every Congregation. Win Every Project.
